

Lab Capabilities

PICS can help you optimize treatment programs, increase efficiency, and make accurate and functional data on-demand ready. With a continuous and reliable sample analysis laboratory we pride ourselves on being a complete solution for your lab analysis, reporting and field testing demands.

Field Testing

Our field technicians gather data on-site through a series of testing, sampling, and analyses to ensure Key Performance Indicators are addressed and chemical treatment programs are optimized.

Lab Analysis

Our lab staff utilizes field and analytical data to prepare in-depth reporting to give you a look at your operations over time.

- Complete Water Analysis
- Solids ID
- Gravimetric (Oil & Grease)
- Membrane Filter Analysis
- Oil Analysis
- API Gravity
- Cloud Point
- Pour Point
- Paraffin Content
- Asphaltene Content
- Viscosity
- Solubility/Dispersion Analysis
- Density Analysis
- Amine Residuals
- Phosphate Residuals
- Serial Dilution
- ATP Analysis
- Bacteria Kill Studies
- Triazine Content Analysis
- Cold Finger Product Screening
- Sparged Beaker/LPR Product Screening
- Scale Loop Product Screening

Reporting

Streamlined Interactive Dashboard that includes ALL the Data

- Financials
- Inventories
- Laboratory Data

Set Key Performance Indicators (KPI) for Data Interpretation

- Good
- Bad
- Extreme

About Us

Your Full Service, Specialty Chemical Company

Pine Island Chemical Solutions (PICS) is a privately owned and operated, full-service, specialty chemical company offering a wide range of products and services to the Louisiana, Texas, New Mexico, Oklahoma, Mississippi, Arkansas, and Gulf of Mexico markets. We have provided the energy industry with quality products and superior technical expertise for over 15 years. PICS is your source for custom products and tailored solutions to deliver on your needs and job expectations.

Core Values

Customer Satisfaction

PICS is committed to delivering top-quality products and services to our customers. With over 15 years of experience, we have provided the energy industry with tailored solutions to optimize programs and increase efficiency.

Safety

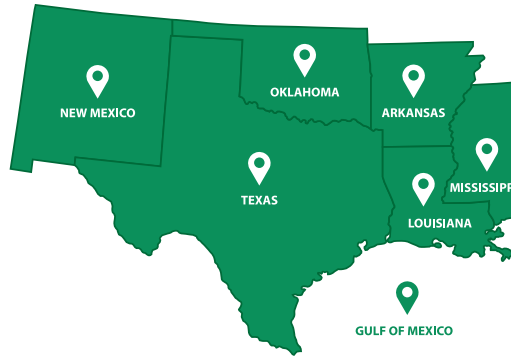

Safety always comes first at PICS and is at the forefront of our culture in the field or at any facility. Adherence to laws, regulations and best practices is the priority in our day-to-day operations.

Environment

PICS believes in protecting the environment and operates all fields and facilities in compliance with all state and federal guidelines.

Markets & Service Area

We are always looking to cover more ground. Though we have a standard service area speak with our team if we can help on one of your sites beyond the territories highlighted.

Customized Solutions & Services

Customers enlist our team for a reason — quality. Our solutions center around integrity management, flow assurance, and phase separation, backed by experienced field and laboratory personnel. PICS is results-oriented, providing flexibility in our products and services. We specialize in tailored solutions and product formulations to meet specific project needs.

Production Chemicals

The full-production chemical line at PICS focuses on asset integrity, flow assurance, and phase separation.

ASSET INTEGRITY

- Biocides
- Combination Products
- Corrosion Inhibitors
- H₂S Scavengers
- O₂ Scavengers
- Packer Fluids
- Clay Stabilizers

FLOW ASSURANCE

- Foamers
- Hydrate Inhibitors
- Paraffin Inhibitors/Dispersants/Solvents
- Asphaltene Inhibitors/Dispersants/Solvents
- Scale Inhibitors
- Surfactants
- Anti-Foulants
- Combination Products
- Iron Control Products

PHASE SEPARATION

- Defoamers
- Demulsifiers
- Water Clarifiers
- Tank Bottom Cleaners
- Reverse Breakers

COMMODITIES

- Acids
- Glycols
- Methanol

Drilling and Completions Chemicals:

We analyze each situation and provide customers flexibility, tailored product formulations, and services to handle each project's specific needs. PICS is your source for quality chemical solutions for drilling, coiled tubing, and completion backed by experienced field and laboratory personnel.

DRILLING CHEMICALS

- Corrosion Inhibitors
- Defoamers
- Emulsifiers
- Friction Reducers
- H₂S Scavengers
- Lubricants
- Rheology Modifiers
- Rig Wash
- Spotting Fluid

COMPLETIONS CHEMICALS

- Acid Corrosion Inhibitors
- Biocides
- Clay Stabilizers
- Combination Products
- Friction Reducers
- High Viscosity Friction Reducers
- Scale Inhibitors
- Solvents
- Surfactants

Water Treatment

The PICS expansive water treatment chemical products line helps sites sanitize, re-use, and maintain oilfield water within compliance.

WATER TREATMENT CHEMICALS

- Biocides
- Corrosion inhibitors
- Demulsifiers
- H₂S/Oxygen scavengers
- Iron sulfide control products
- Scale inhibitors
- Surfactants
- Water clarifiers

Field Service

PICS provides various services that operate under a few segments, and our dedicated team will tailor these services to your specific operation.

- Chemical Program Optimization
- System Troubleshooting
- Remote Tank Level & Injection Rate Monitoring
- Chemical Delivery
- Well Treating
- Remedial Well Stimulation
- H₂S Static Mixer Solutions
